3 Phase model*

### • IP67 Motor (3 phase)

The IP67 rated motor ensures high performance and functionality in most applications.

or

### • IP69K Motor (1 phase)

The IP69K Motor provides reliable performance within the harshest conditions.

# EXTREME

## WASHDOWN FAN

# 2

YEAR WARRANTY

**The Extreme Washdown Fan is the perfect solution for creating effective air movement in work areas where strict hygiene requirements exist. Designed to withstand water from high pressure cleaning without impairing performance.**

### High Performance Motor

Lafert's stainless steel TEMA motors ensure reliable performance when found in the harshest conditions.

### Critical hygiene requirements

The Extreme Washdown Fan is designed for workplaces where there are stringent hygiene regulations and requirements. This includes food and beverage processing factories, kitchens, hospitals and other clean, corrosive or humid environments.

### Blades and motors

Blades and motors are carefully matched to maximise performance and efficiency. Can be speed controlled with a VSD.

### Durable and compliant

Made in Australia to ensure durability, longevity and reliable performance during the life of the fan. Stainless steel finger guards comply with Australian Standards.

### 100% Stainless steel

Constructed from 304 stainless steel for extremely corrosive environments. It comes with a 2 year warranty as standard.

### Able to target Specific Areas

Includes a robust wall mounting bracket that allows the fan to tilt up and down by 20° and rotate by 360°. This enables air to target or avoid specific areas.

### Single Phase Models

Model	FM600-WDF-1
Diameter	24"/610mm
Motor/IP Rating	0.37KW IP69K
Volts	240
Weight	24kg

### Three Phase Models

Model	FM600-WDF
Diameter	24"/610mm
Motor/IP rating	0.37KW IP67
Volts	415
Weight	40kg
